

	<p>Fox cubs are born during early Spring. For the first few weeks they will hide away but they should appear during late Spring.</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>		<p>Deer lose their antlers in Spring but will start to grow a new pair immediately. Are there any deer in your area? If so check out whether they have started to grow their new antlers yet.</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>
	<p>Insects will start to emerge and you should see honeybees, a variety of butterflies and ladybirds by late Spring. This butterfly is called the painted lady – see how many you can spot!</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>		<p>This is a cowslip – another familiar Spring flower. See what kind of areas you can find this flower.</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>
	<p>One of the most familiar Spring flowers is the primrose (pictured left). You can find it mainly in hedgerows. When going for a walk see how many primroses you notice.</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>		<p>Birds that are visiting Ireland for the winter, including waders such as this godwit will still be around in early Spring. See if you can spot any godwits in your area!</p>	<p>Date(s) seen:</p> <p>Location:</p> <p>Comments:</p>
